## 2. News

### 2.1. 25 June, 2009: release 0.3.0 available

The highlight of this release is multiquery optimization that allows to share computation accross multiple queries within a single Pig script. Release Notes are available at the download site

**Note:**

This release works with Hadoop 0.18.

### 2.2. 8 April, 2009: release 0.2.0 available

This release adds types to the language, better error checking, and a 5x performance gain over the 0.1.1 release. Release Notes are available at the download site

**Note:**

This release works with Hadoop 0.18.

### 2.3. 5 December, 2008: release 0.1.1 available

This is the first Pig release as Hadoop subproject! Release Notes are available at the download site

**Note:**

This release works with Hadoop 0.18.

### 2.4. 11 September, 2008: release 0.1.0 available

This is the first Pig release from the Incubator! Release Notes are available at the download site

**Note:**

This release works with Hadoop 0.17.
